

SAFETY LEVEL.

For us, ergonomics and safety should be inseparable and of equal value. Therefore, ergotec's steering system and seatpost components are provided with the ergotec safety level. In this way, the „safety“ can be read directly on the product. This feature is only offered by ergotec products.

The safety level makes a positive sales argument out of the „controversial issue“ of safety. It shows the product quality at a glance, at the same time speaks for the competence of the specialist retailer and spontaneously gains the trust of the customer.

ergotec handlebars.
Always with safety level.

ergotec stems.
Always with safety level.

ergotec seatposts.

PROFESSIONAL SALES SUPPORT
EXCLUSIVELY FOR SPECIALIST RETAILERS

THE SHOP SYSTEM.
MODULAR. FLEXIBLE.
SUITABLE FOR
ANY SALES SPACE.

ERGOTEC SCANNER
PAGES 10-11

ACTIVELY SELLING ERGONOMICS. EXPERIENCE THE STEERING SYSTEM LIVE.

The first shopping system with ergonomic standards. With special modules to interactively present handlebars, stems, grips, seatposts, pedals and more.

**FLEXIBLE, COMPATIBLE, MODULAR
AND COST-NEUTRAL.**

100% TEGO COMPATIBLE

Every part without exception can be used in already available systems (Tego standard) or can be combined with already existing systems of the same type. This applies to brand elements (e.g. head and foot) just like the ergonomic special modules.

100% COST REIMBURSEMENT IN GOODS VALUE

The purchase price of the shop system is calculated for you as a net price incl. VAT. We will reimburse this amount to you with the product without calculation on the basis of the MSRP incl. VAT.

100% FLEXIBLE FOR EVERY SALES AREA

All basic units and wall-width modules are available in widths of 1.00 and 1.25 metres. Or you can start with a gondola (1.40m high, single or double-sided). You can combine the elements as required or add them to your existing system. Everything is possible!

100% COMPATIBLE SPECIAL MODULES

This is completely new. We have developed special modules for handlebars, stems, seatposts and much more. There are also illustrated ergonomic product descriptions on magnet boards. All of these modules are suitable for use in your shop system, in the display window or on the counter!

WALL ELEMENTS.
HEIGHT: 240CM. WIDTH: 100 OR 125CM.

Complete wall element. All elements come in two standard widths, 1.00 and 1.25m.
In this example with the special module “DISPLAY-3”: We are presenting a handlebar, an adjustable stem and a seatpost – all with safety levels.

**THE BEST SALES PROMOTION.
ERGONOMIC ADVICE BECOMES AN EXPERIENCE.**

With the ergotec scanner, you can turn ergonomic advice into a compelling experience for your customers. Your customers experience the real sitting position live. By actively peddling, they can see how the changed settings have an effect on their physical comfort.

At the same time, the customers can see themselves on the display screen of the scanner system. Using this personalised view, they can directly understand the changes to their body posture.

Saddle height and position by knee plumb, handlebar height and handlebar shape as well as the effects of different grips – in a very short space of time

you can work out all of the important settings with the customer. Ergonomics has never been easier to understand. Thanks to the practical changing system, alternative handlebars, grips and saddles can be experienced immediately. At the end, the values determined can be easily transferred from the scanner to the bicycle.

Customers that are given such competent advice make purchase decisions quickly. This is because they had the chance to convince themselves, having physically experienced the advantages. And naturally, they will talk about this eventful advice session, thereby bringing new customers to your business.

Watch movie now.

DISPLAY SCREEN

CHANGEABLE HANDLEBARS

Order no.: 87610000

EXAMPLE: Adjusting the angle of the upper torso. Just change the length of the top tube, handlebar height or stem length. Your customers can see the angle of their upper torso live on the display screen. They can see for themselves the position that is most comfortable for them.

Seat angle:
Can be seamlessly adjusted

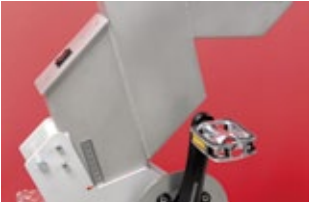

Saddle change:
With a quick release

Adjusting:
Top tube, stem, handlebar

Saddle angle:
Can be seamlessly adjusted

No need to dismount:
Adjust stride length

Knee plumb line:
Can be remotely controlled
